***All warranty products must be returned to DCI for warranty consideration.  
All warranties are null and void if not returned to DCI.***

## **DCI Remanufactured Products**

DCI warrants to the end user that DCI Remanufactured Products are free from defect in materials and workmanship.

This warranty is limited to a period of 12 months and unlimited mileage from the original date of purchase.

The first 90 days of the warranty policy is our "Satisfaction Guarantee" warranty period.

This "Satisfaction Guarantee" warranty policy applies to all normally stocked DCI Remanufactured Products. If the product fails, return it to DCI for warranty consideration.

***DCI's RMA (Return Merchandise Authorization) should accompany the warranty item(s) being returned.  
Log on to [www.dieselnnext.com](http://www.dieselnnext.com) to acquire the RMA (Return Merchandise Authorization) form.***

DCI Remanufactured Products that are not normally stocked will be diagnosed and repaired upon receipt. To ensure prompt repair, please include DCI's RMA form, a copy of the original receipt, and the product.

## **High Performance Products (ie: Pulling Tractors & Pulling Trucks)**

DCI does not warrant to the end user any modified high performance (any product modified 10% or more) tractor or truck pump, injector or turbo.

Customer acknowledges the installation of performance products may reduce or void the engine warranty.

Diesel Controls is not responsible for subsequent damage of any kind caused by any pump, injector or turbo that has been altered from original factory settings.

## **Warranty Exclusions**

Units that have failed due to, but not limited to the following:

- Accident
- Siezed internal parts
- Improper installation
- Abuse
- Alteration
- Misapplication
- Damaged electrical components
- Damaged O-rings
- Contaminates including: Fuel, air, water or dirt

DCI recommends changing all fuel filters with OE spec filters and using a quality fuel additive such as Stanadyne Lubricity Diesel Fuel Additive when installing injectors. Failure to ensure proper OE filtration could result in your warranty being void.

Should your DCI Remanufactured Product be found defective, the warranty coverage is from the original purchase date.

DCI reserves the right to issue a refund for the original purchase in place of product replacement. Refund will be credited to your account in the manner it was paid for on the original invoice. Cash sales are the only exception; cash sales will be credited via Check.

DCI's Limit of Liability ends at the original purchase price of the DCI Remanufactured Product. Incidental or Consequential damages will not be considered.

***There may be special circumstances when a policy adjustment may be implemented.  
This should not be expected and is solely up to DCI's discretion.***
